CONTENTS

Volume 6, Issue Nos 1–8

COMMUNICATIONS IN APPLIED NUMERICAL METHODS

Issue No. 1, January 1990

Accuracy Comparison of Adams–Bashforth and Leapfrog in the Context of Large Eddy Simulation: S. Gao and D. C. Leslie 1

Reducing Modal Truncation Error in the Wave Response Analysis of Offshore Structures: F. Léger, J. M. Ricles and L. J. Robayo 7

A Unified Formulation of Two Existing Time-domain Boundary-element Approaches: R. Gallego and J. Dominguez 17

Implicit Methods for Diffusion–Convection Equations: F. Patrício 27

A Variational Inequality Principle in Solid Mechanics and Application in Physically Non-linear Problems: Sha Desong, Sun Huanchun, Zhang Zhongding and Yin Fuxin 35

A Procedure for Calculating Vorticity Boundary Conditions on the Stream-function–Vorticity Method: R. J. MacKinnon, G. F. Carey and P. Murray ... 47

An Integration Procedure for Curved Boundary Elements: A. Abdel-Akher and G. A. Hartley 49

The Evaluation of Domain Integrals in the Boundary Element Method: H. L. Pina 57

The Use of Network Theory in the Finite-element Analysis of Coupled Thermo-electric Fields: A. A. P. De Alwis and P. J. Fryer 61

Issue No. 2, February 1990

A Note on Localization Phenomena and Adaptive Finite-element Analysis in Forming Processes: O. C. Zienkiewicz and G. C. Huang 71

Constructing Second-order Structural Models with Specified Mass Submatrix Condition Numbers: T. Williams 77

Computer Implementation of the BEM Dual Reciprocity Method for the Solution of General Field Equations: P. W. Partridge and C. A. Brebbia 83

Removal of Integral Singularities: J.-P. Laures 93

The Integrity of Geometrical Boundaries in the Two-dimensional Delaunay Triangulation: N. P. Weatherill 101

BEM for General Anisotropic 2D Elasticity Using Particular Integrals: A. Deb and P. K. Banerjee 111

Remarks on Methods for the Computation of Boundary-element Integrals by Co-ordinate Transformation: J. Sanz-Serna, M. Doblaré and E. Alarcón 121

Indexed or abstracted by 'Abstract Jnl of Earthquake Engineering', 'Applied Mechanics Reviews', 'Boundary Elements Abstracts', 'Cambridge Scientific Abstracts', 'CITIS-Civil Engineering Abstracts', 'Current Contents', 'Engineering Index Inc.', 'Eng. Societies Library', 'INSPEC', International Petroleum Abstracts', 'Mathematical Reviews', 'Newsletter of Engineering Analysis Software', 'Zentralblatt für Mathematik'.

Finite-element Analysis for Immiscible Two-phase Fluid Flow in Deforming Porous Media and an Unconditionally Stable Staggered Solution: Li Xikui . 125

Substructure Method for Stress Analysis of Mass Concrete Structures: Zhu Bofang 137

On the Numerical Solution of a Model Air Pollution Problem with Non-smooth Initial Data: W. L. Seward, P. S. Kasibhatla and G. Fairweather 145

CONFERENCE DIARY 157

Issue No. 3, April 1990

An Easily Implemented Static Condensation Method for Structural Sensitivity Analysis: S. N. Gangadharan, R. T. Haftka and E. Nikolaidis 161

Finite-difference Solutions of Partial Differential Equations: M. C. Bhattacharya 173

On Fast Determining Eigenvalues in Vibration: R. Z. Zimoch 185

Comments on a Simple Algorithm for the Plotting of Contours: C. Singh..... 191

Study of 20-node Solid Element: Y. H. Kim, R. F. Jones and S. W. Lee 197

Sloshing in Two-dimensional Container with Inclined Side Walls — Boundary-element Approach: N. Kamiya and H. Miyazawa 207

Numerical Modelling of Crack Propagation Using Multi-variable and Breakable Finite Elements: J. Y. Zhang, T. R. Hsu and I. Q. Wang 215

Modified Formulae for Three-dimensional Direct Stress-intensity Factor Computation: N. D. Hung and G. De Saxce 223

Using Preconditioned Conjugate Gradient for Solving Consecutive Linear Systems: J.-Y. Blanc, P. Comon and D. Trystram 231

CONFERENCE DIARY 241

Issue No. 4, May 1990

Elastic-plastic Hybrid/Mixed Finite-element Method and its Application to the Non-uniform Tension of Square Sheet Metal: Ping Hu and Dajun Zhou 247

On the Principle of Cyclic Symmetry in Machine Dynamics: V. Ramamurti and P. Seshu..... 259

On the Construction of Physical Systems from Spectral Data: R. Z. Zimoch ... 269

A New Third-order Finite-difference Method for Transient One-dimensional Advection–Diffusion: B. J. Noye..... 279

Computation of the Eigenfrequencies of Acoustic Cavities: a New Penalty Method: A. Cifuentes and R. Coppolino 289

Time-domain Boundary Element Analysis for Linear, Viscoelastic Problem Subject to Body Force: Woo Jin Sim and Byung Man Kwak..... 297

On Higher-order Asymptotic Factorization of Non-linear Operators: A. G. McMorran and C. H. Cooke 305

ODE Approach to Minimum-weight Design of Pinned Columns in Buckling: Si Yuan 313

On the Box Scheme for Overland Flow Calculations: W. L. Wood and P. D. Arnold 323

CONFERENCE DIARY 327

Issue No. 5, July 1990

Estimating the Form of Some Three-dimensional Singularities: Y. S. Abdel-Messieh and R. W. Thatcher 333

Finite-element Design Sensitivity Analysis for Non-linear Potential Problems: R. Mäkinen 343

A Curved Triangular Plate Bending Element for Kirchhoff Plates Using A C^0 Coharmonic Mixed Two-field Formulation: J. S. Campbell and B. Horgan .. 351

Finite-element Method for Elastic Wave Propagation: F. J. Serón, F. J. Sanz, M. Kindelán and J. I. Badal 359

Generalized Variational Principles: M. D. Mikhailov 369

A Practical Method for Computing the Exponential of a Matrix and its Integral: D. Westreich 375

A Fundamental Solution for a Plate on an Elastic Half-space: D. F. E. Stolle... 381

Experiments on Iterative Solution for the Semi-implicit Characteristic–Galerkin Algorithm: L. Bottura and O. C. Zienkiewicz 387

An Efficient Algorithm for Generating B-spline Interpolation Curves and Surfaces from B-spline Approximations: H. P. Wang, D. E. Hewgill and G. W. Vickers 395

Perturbed General Eigensolutions: A. Y. T. Leung 401

CONFERENCE DIARY 411

Issue No. 6, August 1990

Free Vibrations of Spatial Rods—a Finite-element Analysis: G. Karami, M. Farshad and M. Yazdchi 417

An Isoparametric Finite-element Stokes Flow Test Problem: M. K. Maslanik, R. L. Sani and P. M. Gresho 429

Axisymmetric Potential Flow Calculations. Part 1: Analysis Mode: R. M. Barron, S. Zhang, A. Chandna and N. Rudraiah 437

Weighting Functions in Single-step Algorithms for a Non-linear Equation: N. J. Salamon and J. Xiang 447

A New Formulation for Plate and Shell Finite Elements: S. S. J. Moy and S. S. E. Lam 457

Imposing Linear Constraints in Finite-element Analysis: J. P. Webb 471

The Spline Finite-strip Method in the Buckling Analyses of Thin-walled Structures: G. M. Van Erp and C. M. Menken 477

BOOK REVIEWS 485

ANNOUNCEMENTS 487

CONFERENCE DIARY 490

Issue No. 7, October 1990

Moving and Deforming Finite-element Simulation of Two-dimensional Stefan Problems: N. Zabaras and Y. Ruan 495

The Jacobian Derivative Method for Three-dimensional Fracture Mechanics: E. J. Barbero and J. N. Reddy 507

A Note on the Boundary Layer in the Sixth-order Theory of Transverse Bending of Anisotropic Shear-deformable Elastic Plates: E. Reissner 519

A Selective Reduced Integration Triangular Plate Element: M. Ferahi, B. Tabarrok and W. L. Cleghorn 525

Unsteady Thermal Stress Analysis in Three-dimensional Problems by Means of Boundary-element Method: Y. Ochiai and R. Ishida 535

Sparse Matrix Approximation to an Integral Equation of Scattering: F. X. Canning 543

Combining Material and Element Rotation in One Formula: P. Pedersen 549

A Non-iterative Technique for Design of Aerofoils in Incompressible Potential Flow: R. M. Barron 557

BOOK REVIEW 565

CALL FOR PAPERS 567

CONFERENCE DIARY 569

Issue No. 8, November 1990

Bifurcations of an Oscillator to Two-harmonic Excitation: A. Y. T. Leung and T. C. Fung 573

Non-associative Drucker–Prager Plasticity at Finite Strains: G. Hofstetter and R. L. Taylor 583

Boundary-element Analysis of Wave Scattering from Cracks: Z. H. Jia, D. J. Shippy and F. J. Rizzo 591

Modelling of Turbulent Transonic Flow Around Aerofoils and Wings: B. Müller and A. Rizzi 603

On Buckling Mode Superposition in Non-linear Analysis of Shells: F. G. Flores and L. A. Godoy 615

A Numerical Technique for Two-dimensional Transient Wave Propagation Analyses: Y. Mengi and A. K. Tanrikulu 623

A Simplified Approach to Calculate the Damping Ratio Matrix for Multiple Degree of Freedom Vibration Systems: J. M. Wilson and L. Man 633

CONFERENCE DIARY 639
